E-PAYABLE SOLUTIONS FOR BUSINESSES

From Juvo's earliest days as a Telecom Expense firm, we developed relationships with telecom vendors and carriers all over the country. From ATT to Zayo, we could truly claim that from "A to Z" we had effective solutions for even the most unique customer requirements. **We have taken that same mindset, and extended it into the e-payables market.** Having over a decade of experience dealing with finance charges, late fees, random payment terms, and all the other issues related to paying bills on behalf of our telecom clients, we've learned what works, and what does not. In the same manner that not every telecom solution works for every customer, not all e-payable solutions are alike. Having relationships with some of the leading e-payables providers in the market allows Juvo to again offer truly unique solutions for those companies looking to move away from out dated modes of vendor payment.

IN 2015, JUVO HELPED CUSTOMERS EARN ROUGHLY
\$20,000,000 IN CASH

ABOUT JUVO TECHNOLOGIES

From construction companies needing job costing and approval systems within their telecom environment, to streamlining the payables process and earning rebates within enterprise sized accounting departments, to mitigating risk and driving regulatory compliance across entire organizations, Juvo is helping its customers solve some of their most complicated issues. Juvo knows that every organization is unique, and our entire team is committed to creating simplified solutions that avoid the temptation of using cookie cutter templates that worked for someone else 5 years ago.
