

**Juvo in 25 Words**

Juvo is Latin for “help” and that’s what we do: we help clients navigate and manage the complexities that come with telecom and technology advancements.

**Juvo in 45 Words**

Juvo is Latin for “help” and that’s what we do: we help clients navigate and manage the complexities that come with telecom and technology advancements. With client operations across North America, Juvo assists with everything from vendor and carrier negotiation, to network design and security.

**Juvo in 95 Words**

Juvo is Latin for “help” and that’s what we do: we help clients navigate and manage the complexities that come with telecom and technology advancements. With client operations across North America, Juvo assists with everything from vendor and carrier negotiation to network design and security. With proprietary software that gives clients meaningful insight across their entire telecom and technology environment, Juvo is passionate about technology and its capabilities. While we like to be on the cutting edge, we believe there is a difference between trend and innovation. We help our clients figure out the difference.
